

Links to my video-clips on YouTube

I have just started to use the video function of my photo-camera and I intend to upload some of them to YouTube, showing some of the junk-rigged boats in Stavanger.

Arne

Broremann sailing, June 20, 2012

This is my very first video-clip ever which I upload to Youtube. It shows a 45s clip taken from the helmsman's position of Broremann. The camera was set in VGA-mode which consumed about 1.4MB/second or 63MB for that 45s clip - it took me 15 minutes to upload it. The video was a bit reduced in quality when presented from the YouTube. One thing to notice is the wind noise, even in just F3. I will experiment with a (woolen) wind noise damper on the built-in microphone.

Here is the first link:

<http://www.youtube.com/watch?v=crdXqaNigzw>

Hopefully there will be more of them later.

Note:

Some video clips are so short that I have just uploaded them to my Dropbox, so I just let you have the addresses here. You get best resolution by downloading the files and then playing them on your device.

20140601 Marie G sailing alongside Frøken Sørensen (19MB, 11sec):
